1Q (g=0.3)
2Q com. (g=0.3)
2Q ind. (g=0.3)
2Q norm. com. (g=0.3/√2)
2Q norm. ind. (g=0.3/√2)
(a) Costo totale del sistema: $C_{2,\mathrm{tot}}/\omega_c^2 = \frac{1}{2}\sum_j \int_0^T \Omega_{D,j}(t)^2 dt$
(b) Costo massimo per singolo canale: $C_{2,\max\mathrm{ch}}/\omega_c^2 = \frac{1}{2}\max_j \int_0^T \Omega_{D,j}(t)^2 dt$
Costo energetico C_2/ω_c^2 (Eq. 4 paper)
